Revitalisation area

The map illustrates the 'Revitalisation area' in Warsaw, Poland, which is outlined in red. This area is situated along the Vistula River (Wisła) and encompasses several districts, including Praga-Północ (North Praga) and Praga-Południe (South Praga). The map shows a dense network of streets, with major roads like Szwedzka, 11 Listopada, and Kijowska clearly marked. The Vistula River flows through the center of the area, with various quays (Wybrzeże) labeled. The map also shows the proximity to the city center, with districts like Śródmieście and Stare Miasto visible. The red outline highlights the specific area targeted for revitalisation efforts.

Goals of the project

- ✓ Safer and more comfortable space for pedestrian and cyclists
- ✓ Priority for green areas (instead of parking space or lanes for cars)
- ✓ Improvement of the aesthetics in the context of planned investments in the area of the Integrated Revitalisation Program.
- ✓ Create a universal tool for implementing changes in a space of street.
- ✓ Make people excited about changes! (and changing their commuting habits ;-)

Priorities

- Road safety – focus on pedestrians and cyclists

Priorities

- Quality of space – details

Priorities

- Design of green areas - from the beginning of a project

Priorities

- Universal design - full accessibility

Priorities

- Dialog in planning – engaging inhabitants

Project stages

- ✓ Analysis of the area
- ✓ Choosing types of public spaces, eg
 - ✓ a city street with tram
 - ✓ woonerf,
 - ✓ shopping street,
 - ✓ pedestrian street,
 - ✓ historic street,
 - ✓ open courtyard,
 - ✓ piazetta,
 - ✓ square park

Project stages

- ✓ Defining each type and proposing solutions
- ✓ Assignment to all streets a specific type + design of a communication system and service program connected with public space
